FOR IMMEDIATE RELEASE

INT Releases GeoToolkit 4.2

GeoToolkit™ is a cross-platform C++ library of components that permit developers to fast-track their development of Oil and Gas E&P applications in Windows or Linux. Versions are also available for Java and C#/.NET.

Houston, TX (July 6, 2011): Interactive Network Technologies, Inc. (INT), a leading developer of high performance graphics components, announces availability of GeoToolkit 4.2.

Developed for data visualization in upstream Oil and Gas, GeoToolkit is a package of C++ libraries including support for specialized Seismic, Contour, WellLog, and Well Schematic displays. GeoToolkit also provides cutting edge features such as multi-language support, sophisticated vector object handling, scaled display and hardcopy (including CGM output,) and is integrated with Nokia's Qt4 environment. GeoToolkit components reduce effort required to complete software development projects, promote reusability and consistency across applications, and allow developers to focus on their core technologies rather than spend time writing data displays.

Some highlights for this new release include:

- Introduction of a new OpenGL rendering driver for Qt
- Support for Qt 4.7.x and Visual Studio .NET 2010
- Enhancements to Chart libraries, including multiple selection within charts and ability to link charts. Improved Tornado, Rose, and BoxPlot charts
- Improved Seismic display with support for anti-aliasing, transparency, and image rotation
- New indexed seismic data support for rapid access of large datasets
- Updated Deviated WellLog library and support for Qt light-weight tracks

For more information about GeoToolkit, or to request an evaluation, visit our website at www.int.com.

About INT:
INT is a leading supplier of graphics software components for data visualization in Upstream E&P and other technical industries. Our products include open and expandable visualization software, visualization software development components, and software development services. INT solutions support Java, C++, and .NET environments. INT is a Microsoft® Certified Partner.

INT, the INT logo, and GeoToolkit.NET are trademarks of Interactive Network Technologies, Inc. in the United States and/or other countries.. For more information about INT, please visit www.int.com or e-mail intinfo@int.com
