**FOR IMMEDIATE RELEASE**

## INT Releases GeoToolkit.NET 3.6

*Specifically designed for the Microsoft®.NET environment, GeoToolkit.NET delivers high performance graphics capabilities for Oil and Gas E&P applications being developed in the C# language. GeoToolkit versions are also available for Java and C++.*

**HOUSTON, Texas (March, 2014)** – Interactive Network Technologies, Inc. (INT), a leading developer of high performance graphics components, announces availability of GeoToolkit.NET 3.6.

Developed for data visualization in upstream Oil and Gas, GeoToolkit.NET is a package of C# libraries including support for specialized Seismic, Contour, WellLog, and Well Schematic displays. GeoToolkit.NET also provides cutting edge features such as localization, simplified web support, and sophisticated vector object handling. GeoToolkit components speed up software development, promote reusability and consistency across applications, and allow developers to focus on their core technologies rather than spend time writing data displays..

Highlights for this new release include:

- Velocity mode added for seismic display
- Variable trace start samples are now supported
- NaN values for trace samples are now supported
- The spacing between traces in model coordinates (traces) for Density mode is supported
- New trace status type for Density mode was added
- DLIS parser added for well logs
- Deviated well log performance enhanced
- New “Legend” labeling strategy for schematics. A new labeling strategy is applicable when each schematic element has letters/numbers reference and separate description underneath

For more information about GeoToolkit.NET, or to request an evaluation, visit our website at [www.int.com](http://www.int.com).

**About INT:**

INT is a leading supplier of graphics software components for data visualization in Upstream E&P and other technical industries. Our products include open and expandable visualization software, visualization software development components, and software development services. INT solutions support Java, C++, and .NET environments. INT is a Microsoft® Certified Partner.

INT, the INT logo, and GeoToolkit are trademarks of Interactive Network Technologies, Inc. in the United States and/or other countries. For more information about INT, please visit [www.int.com](http://www.int.com) or e-mail [intinfo@int.com](mailto:intinfo@int.com).
